

How to connect to SessionLinkPro

Connecting to SessionLinkPro is as easy as connecting to Zoom or Teams.

STEP 1 - Click 'Click here to join the VO session'

STEP 2. Enter your name in the box at the top, then choose your audio interface in the two drop down lists - for example, if you have a Scarlett Solo, then choose Scarlett Solo for both INPUT and OUTPUT.

STEP 3 – Press START.

That's it. Wait until the studio connects and you hear the engineer's voice. You don't need to change anything – just wait.
