

How to connect to SessionLinkPro

Connecting to SessionLinkPro is as easy as connecting to Zoom or Teams.

STEP 1 - Click 'Click here to join the VO session'

ACCEPT PERMISSION IF ASKED.

STEP 2. Enter your name in the box at the top, then choose your audio interface in the two drop down lists - for example, if you have a Scarlett Solo, then choose Scarlett Solo for both INPUT and OUTPUT.

STEP 3 – Press START.

That's it. Wait until the studio connects and you hear the engineer's voice. You don't need to change anything – just wait.
